Select in advanced options when you register:

<https://matrix.donaldsarmy.us/>

We knew this was not going to be easy.

We knew we were going to get hit when we were over the target.

We are over the target.

I was not able to do so.. I don't think you can just switch server as the username can already be in use on other server.. they are completely separate and you will need a new account.

There is a "advanced tab" when you register.

You enter the donaldsarmy.us address there

– [alex\\_p\\_keaton\\_III](#) 2 points 5 hours ago +2 / -0

Where are you stuck? If it's on the registration page of element.io, you need to start the registration of a new account, but before you fill out the user name and password there are three square boxes (above the space to fill out

your user and password). Select the box on the right and change the information from the default listing to <https://matrix.donaldsarmy.us/> Then fill in user and password. Once you're registered, you'll need to select "rooms" (IIRC) on the left hand side of the page. That should get you to the states to choose to join. Hopefully I remembered all of the steps.

▲ 2 ▼

– [Scooby721](#) 2 points 5 hours ago +2 / -0

I wish that had been clarified. So what if I made an account first? Will I be able to get in? Or am I going to have to start over from scratch?

[parent](#) [permalink](#) [save](#) [report](#) [block](#) [reply](#).

▲ 1 ▼

– [alex\\_p\\_keaton\\_III](#) 1 point 5 hours ago +1 / -0

Just log out and create a new account (right from the login page) and select the box on the right first. I did the same thing and muddled my way through and figured it out. I used the same user name and password for the new account (YMMV). Make sure if you ever log out to enter in the <https://matrix.donaldsarmy.us> in the box instead of the default if you keep the same user and password. The computer literate don't always make it clear what to do, unfortunately.

You have to go under the advanced tab first, before creating an account.

Go to advanced, copy the server url mentioned above, then create an account. That way, your account will be registered only to that server and not for other servers on that website, at least that's what I understand.
